

JAYSIGNAL

Black Lines above/below arrow = Stop Line
 A 2/3rd body candle close above or below the stop line line is the stop loss, wicks not included.

Example of a 2/3rd body candle close, not a wick!

Fib dots = Buy or Sell Area
 Arrow=Possible Elliott Wave Pattern
 Triangle=Entry Bar on closing basis

5 sym renko is the most accurate chart.
 This chart shows all deep retracements.

3 sym renko chart trades can ONLY be taken with a break and retest of the Jaysignal Market Profile LVA and HVA levels with Jaysignal entry.

2 Wave Patterns

1. Motive Waves - These waves are with the 5 minute trend and are the best waves to take.
2. Corrective Waves - These waves are against the 5 minute trend and only can be taken breaking back inside of HVA or LVA on Jaysignal with a JaySignal first retracement entry. This is the ONLY time you can counter Jaysignal.

Exits=Symmetry dots or ATM strategy are used to scale and for runners.
